

FADE (ITA)

Fade is a 22-year-old songwriter and musician.

Influenced by artists such as Bruce Springsteen, Paul McCartney, William Blake and Jack Kerouac, he may represent the common point between 2000s popular music and 70/80' lyricism.

With his debut EP *After Midnight* he tries to give voice to his feelings, preferring a sentimental style of writing than a more technical one. With his powerful lyrics and groovin' music, his aspiration is to arrive straight to people's hearts, sharing his nostalgic and romantic ideal world.

After Midnight is **Fade's** debut EP. Written during a music summer trip in Los Angeles, the young songwriter sings about an idyllic California, describing all her light and darkness.

With his music, the author tries to give a mystical sound to four emotional stories, dealing with some common night themes: love, car rides, pub games, drugs and prostitution.
